São Paulo - SP, Brazil

Lucas de Oliveira

Front-end Developer

I worked on web projects that use JavaScript as the principal technologie on the front-end. I have gained more experience and knowledge in creating resposive web screens, dynamic interfaces, and enchacing the overall user experience. Also, I built websites with structure ASP.NET MVC, C# technology to build components and use of technologies that are part of .NET Core. My principal skills contains HTML, CSS, SASS, JavaScript, TypeScript, React JS, jQuery, .NET Core and C#.

Experience

Afixcode Administrative Solutions Ltd

Junior Frontend Developer (January 2024 - Current)

Contributing to a time management and productivity software, I performed maintence and applied improvements in web responsivy, software functions, created components with C# for Back-end, and other general improvements. The execution of tasks also involved utilizing technologies such as JavaScript, HTML, CSS, SASS, and jQuery to maintaining and improving the Front-end of the software.

- Development and maintenance of a responsive productivity web system, prioritizing interactive and dynamic interfaces using HTML, CSS, SASS, JavaScript, and jQuery.

- Collaboration with the team on implementing new components for the productivity system using technologies like C#, .NET, and JavaScript.

- Active participation in team code reviews and project planning.

- Team collaboration in brainstorming and creating new ideas for system components and features.

- Utilization of Git and Azure DevOps for version control, ensuring efficient management of changes and updates.

- Regular check-ins to specific branches for new features, bug fixes, and performance improvements.

- Debugging and fixing critical bugs in the productivity system, including data synchronization issues and layout failures on smaller screens, resulting in a smoother user experience.

Trainee (September 2022 - December 2023)

I worked on system of solutions for asset control and a project of time management and productivity software. Also I participated in the creation of project to management users of the company. And I learned more about technology ASP.NET MVC, language programming C# and projects management with GitHub.

- Collaboration with the team in applying best practices for coding and software architecture.

- Support in the development and maintenance of responsive internal web systems and productivity platforms, ensuring stable and optimized functionality across different devices.

- Assistance in developing and creating web interfaces with HTML, CSS, and JavaScript, as well as resolving impactful interface bugs.

- Support in developing and creating components with C# and .NET, as well as fixing critical bugs in data request processes.

Education

Udemy
Conclusion - 2023

Complete web modern course with JavaScript plus projects - São Paulo, Brazil.

- JavaScript (ES6)
- jQuery
- Ajax
- React JS
- Vue JS

Cruzeiro do Sul University
Conclusion - 2023

Technology Degree in Systems Analysis and Development - São Paulo, Brazil.
